WORK EXPERIENCE

Anzer - by Modulus Global   *Scottsdale, AZ*

Software Developer (Technology - AI focus)   *April 2023 - Present*

- Collaborated with the team on integrating various APIs into our frontend, significantly enhancing the tracking and analysis of potential sales, optimizing the sales funnel for our clients.
- Contributed to a team effort in crafting and implementing the React based user interface, enhancing user experience.
- Developed innovative fingerprinting algorithms in JavaScript that improved user identification processes and ensured data integrity, bolstering the security framework of Anzer Base.
- Improving our cutting-edge AI intelligence platform by leveraging AGI to enrich the frontend with advanced, interactive AI functionalities
- Utilized Jira for project management.
- Designed and implemented interactive data visualization graphs using React-Three-Fiber that demonstrate Anzer Base's potential to boost the sales of our clients by 15% or more.

-Thorpass committee for Anzer

- On the SOC2 compliance committee for Anzer, demonstrating my commitment to the highest levels of data security and privacy for Anzer Base's clients.

Modulus Global   *Scottsdale, AZ*

Software Developer (Fintech)   *June 2022 - Present*

- Addressing and resolving complex software issues or requests mostly in React, ensuring our clients have reliable and robust application performance.
- Leveraging our CSM tool to manage client issues, create comprehensive documentation, and produce diagrams illustrating code processes.
- Improved real-time data processing with Node.js by integrating and optimizing WebSockets, resulting in an increase in process efficiency.
- Developing and enhancing frontend features for high-performance and better UI/UX.
- Updating and maintaining projects dependencies and packages.

Infuseable Care   *Scottsdale, AZ*

Web Developer Intern (Health Insurance Industry)   *February 2022 - June 2022*

- Made minor contributions to their single page website .
- Acquired knowledge of healthcare industry standards, focusing on insurance codes including CPT codes and ICD-10.

LEADERSHIP EXPERIENCE & TEAM ACTIVITIES

- Led a small team to implement our own fingerprinting and tracking mechanisms that were fully compliant with SOC2 standards, reinforcing the company's commitment to data security and privacy.
- Part of a team that meticulously ensured SOC 2 compliance through rigorous checks, thereby establishing a robust framework for continuous compliance monitoring.
- Played a pivotal role in a team that implemented video analysis tools, focusing on UI/UX enhancements to improve the company's multimedia data processing capabilities.

EDUCATION

Certificate in Full Stack Web Development University of Arizona
